

**Rigid-Chain Polymers: Hydrodynamic And Optical
Properties In Solution (Macromolecular Compounds)**

By V.N. Tsvetkov

[READ ONLINE](#)

Molecular structure and physical properties of -

the molecules of rigid chain polymers are generalized of hydrodynamic properties and optical anisotropy of of the rigid chain molecules

Design Strategies for Fluorescent Biodegradable -

2. Fluorescence Mechanism. Understanding fluorescence mechanism of materials is a key in the design biodegradable fluorescent polymers. Conventionally, process of all

Pascal Andre | University of St Andrews - -

Pascal Andre, University of St The solution properties may result in inaccuracies in the claimed chemical identification or intrinsic optical properties

Hydrodynamic, optical, and conformational -

TSVETKOV V. N. (1); BUSHIN S. V. (1) Institute of Macromolecular Compounds, The conformational and optical properties of molecules were analyzed within the

Hydrodynamic invariant of polymer molecules - -
